Charlie Brockmeier

Finance at the core. I build AI products for private markets.

New York, NY · charliebrockmeier@gmail.com · linkedin.com/in/charliebrockmeier · github.com/charliebrockmeier

Finance-first builder in private markets. Senior Associate at MSCI Private Assets, working on AI-powered pre-investment diligence for private-fund investors, after joining through MSCI's acquisition of Vantager, where I was on the early team. Finance and accounting at the University of Nebraska–Lincoln, with minors in computer science and math; shipping LLM products since 2023.

EXPERIENCE

MSCI — New York, NY
Senior Associate, Private Assets — Mar 2026 – present

- Work on MSCI's AI-powered pre-investment diligence for private markets: tools that help pensions, endowments, foundations, family offices and wealth managers size up private funds before they commit capital.
- Joined through MSCI's March 2026 acquisition of Vantager, whose platform now anchors MSCI's pre-investment diligence offering.
- Industry conferences for the business in 2026, including Future Proof and a CFA Institute conference.

Vantager (acquired by MSCI) — New York, NY
Growth & Product Analyst — Mar 2025 – Mar 2026

- Early team member at an AI-native pre-investment diligence platform that turns GP data-room documents into diligence reports; part-time from March 2025, full-time in New York from June 2025, through the acquisition.
- Built out the Template Marketplace: new diligence templates and easier access to them for customers.
- Ran data-quality checks and platform QA on AI-generated diligence reports, focused on accuracy and user experience.
- Built golden datasets to evaluate and improve the AI system, and financial models for the business.
- Turned customer feedback into product work: built the CEO's meeting-note and customer-feedback system, ran product demos, and worked with the CEO on go-to-market and sales strategy.

Three Bridge Wealth Advisors — San Francisco, CA
Financial Analyst, Investment Committee — Jan 2024 – Feb 2025

- Ran private-investment due diligence for a multi-family office: intro calls, investment memos and committee overviews; in person in San Francisco for summer 2024.
- Maintained the firm's investment database, with a focus on private investments.
- Automated research and reporting work with Python scripts and AI.

Earlier internships

Covisum, Agile Developer Intern, Omaha, NE, Summer 2023. Built financial-advisory tools and a client intake form with the CEO.
Buckle, Software Developer Intern, E-Commerce, Kearney, NE, Summer 2022. Shipped production features, including the favorites page.
Cash-Wa Distributing, IT Intern, Kearney, NE, Summer 2021. Python macros; built and audited the IT department's hardware.

PERSONAL PROJECTS

Locus. Personal OS for money, calendar and documents with an AI assistant (Next.js, Supabase, Plaid); read-only by design, 4,349 tests.
Faceless engine. Turns 226 official data series into fact-checked, narrated short videos for three pages (TypeScript, Remotion, Claude).
Obituary monitor. Weekly agent that reads 10 funeral-home sites and flags watchlist names, with one adapter per site platform.
Phyt. A fitness app for iPhone, designed and built end to end, logo included.
Research. *The Illiquidity Premium and Its Impact on Asset Pricing and Returns*. Paper for Strategic Finance Management (FINA 475H), May 2025: what sets the premium and how it shows up across public markets, PE/VC, real estate and private credit.
